

## Installing Diskeeper 2011 System Center Operations Manager (SCOM)

This document describes the process to install the Diskeeper 2011 System Center Operations Manager (SCOM) software. Please note that prior to installing the Diskeeper 2011 SCOM software, Diskeeper 2011 will need to be installed on the server running SCOM. In this example, SCOM is installed on Windows Server 2003 Enterprise (SP2) 32 bit Edition.

The following screen in the Programs and Features setting of the Control Panel shows Diskeeper 2011 is installed on the server.

Once the installation process has started, follow the installation instructions until the installation is complete.

Once the installation is finished, run the SCOM Operations Console by selecting **Start / All Programs / Systems Center Operations Manager / Operations Console** and select **Import management packs**.

Select the file DiskeeperCorporation.SCOM.MP.mp and click Open button.

				Ingtall		Cancel

Once this is complete, a message will appear mentioning that all import functions have been completed successfully. Select **Close** to finish the import process.

SCOM is now configured to monitor and report on Diskeeper installations. While in the SCOM Operations Console, select **Administration - Management Packs** to display the Diskeeper Management Pack in SCOM.
